FULL-STACK DEVELOPER

Highly motivated and results-oriented software engineer with 5 years of experience in web development. Skilled in a variety of programming languages and frameworks, with proven ability to develop, maintain, and debug complex software applications. Experienced in building scalable, user-friendly solutions using Laravel for backend development and Vue.js for dynamic frontends, complemented by modern UI design with. Seeking a challenging position to leverage my expertise and contribute to the success of a growing company.

SKILLS

PHP	PhpUnit Testing	NodeJS	Material UI	Payment Integration
Laravel	Javascript	AWS Services	Bootstrap	API Integration
Laravel Nova (CMS)	ReactJS	MySQL	Sass	Vuejs+ Capacitor

PROFESSIONAL EXPERIENCE

More Telecom (Emapta)   **Aug 2024 - Present**
Fullstack Developer | Full-Time
Maintain full-stack systems for customer-facing websites and internal admin applications, managing tools such as ABB and Vocus technology. My work includes creating and maintaining modules related to checkout, accessibility, and mobile responsiveness, while ensuring seamless connections to backend services and APIs. I integrate and consume Vocus APIs to support frontend requirements, and my recent projects involve implementing ABB features into the frontend to enhance functionality and user experience.

Technologies : *Laravel, Typescript, JavaScript, Capacitor + Vuejs (mobile app), Laravel Framework, Mysql, Saas, HTML & CSS Rest API, ReactJS, JIRA, Github Actions, GIT, Docker, Vuejs, Quasar*

Lanex Corporation   **Oct 2023 - July 2024**
Software Engineer | Full-Time
Worked on a centralized control and energy management system for refrigeration equipment. My responsibilities included maintaining the application to monitor overall health and performance, handling server-related tasks such as deployment to production and staging environments, and identifying and troubleshooting bugs reported by users or found during testing. I also debugged and fixed issues within the codebase to ensure smooth and reliable system operation.

Technologies : Nodejs, Typescript, JavaScript, AWS Iot, Pulumi, Laravel Framework, Mysql, DynamoDB, HTML & CSS Rest API, GraphQL, ReactJS, JIRA, Github, GIT, Docker

Coreproc Inc.   **July 2022 - October 2023**
PHP Developer | Full-Time
Worked on a customer-facing raffle entry website for a well-known cigarette brand in the Philippines. My role involved developing new features and maintaining the application to ensure its overall health and performance. I was responsible for guaranteeing code quality through thorough testing across all stages of development. In addition, I implemented third-party APIs, including ID and face verification features, to strengthen security and compliance. I also contributed as part of the team that created internal Laravel packages, which were designed for modular consumption and streamlined integration across different parts of the system

Technologies : Php, Laravel Framework, Laravel Nova (CMS), VueJS, Mysql, HTML & CSS
Rest API, PHPCS, PHPStan, PhpUnitTesting,Github, GIT

Codevidia   **March 2021 - July 2022**
Full-Stack Developer | Full-Time
Develop new features and maintain the existing application for monitoring the overall health and performance of applications. Implement unit testing to ensure the quality of the product. Implement third-party APIs, integrate payment (Stripe), create migration schemas, and plan the overall project structure.

Technologies : React JS , Ant Design , Laravel Framework, PHPunit, GIT, PHP, MYSQL,
Bootstrap, HTML & CSS, Jquery, Axios, Sass

Boxtypd Technologies   **2020 - March 2021**
Junior Full-Stack Developer | Project Base
Develop new features and maintain the existing application for monitoring the overall health and performance of applications. Implement unit testing to ensure the quality of the product. Implement third-party APIs, create migration schemas, and participate in planning the overall project structure.

PROJECTS

Region 12 Online Processing Platform
A government online platform that manages sales promotion and other services catering to all users/businesses in region 12.

Job Portal Application
It serves as a medium where job seekers can create profiles, upload resumes, and search for job openings in Canada.

Homecare Management App
Similar to a job portal but focused solely on home care nursing in the UK. This includes storing personal data of users with Google Map implementation for location verification.

Technologies : PHP, React JS , Ant Design, Bootstrap, Laravel Framework, PHPunit, GIT, MYSQL,
Bootstrap, HTML & CSS, Saas, Jquery, Axios, Javascript
